

# Hiperwall Video Walls for Utilities

Hiperwall video wall software enables real-time data monitoring and enhanced decision making.

*The Hiperwall video wall in Sempra Energy's Business Intelligence Center allows analysts to visualize critical information at a glance.*

## Challenges

Utility companies have the unique challenge of visualizing many large streams of diverse data simultaneously, and presenting that information to a large room of analysts. The use of custom-made applications and cumbersome SCADA diagrams makes displaying and organizing all necessary content difficult. For an operator, you are traditionally limited to small, independent displays for data visualization. When an emergency situation arises, every second spent trying to interpret data without a centralized platform can cost thousands of dollars and jeopardize lives. You need to be able to manipulate content quickly and accurately in order to effectively respond to crises and ensure decision makers have access to all relevant information.

## Solution

Hiperwall is a 100% software video wall solution that can run on almost any hardware. We feature a drag and drop content management interface for ease of use, and à la carte add-ons for enhanced capabilities. Our scalable software allows you to add displays and sources of content as your needs increase, giving you the flexibility to start small and grow later.

## Advantages of Hiperwall

- Easily monitor the performance of equipment, locations, and personnel.
- Combine content from many sources to see an aggregate view of all necessary operating data.
- Display virtually any type of content including custom software applications, live IP camera feeds, live TV streams, SCADA diagrams, web pages and more.
- Limitless resolution allows you to display ultra-high resolution content with unmatched clarity.
- Quickly switch between saved environments (layouts) that correspond with various situational applications.
- Zero down-time with industry leading fault-tolerance.
- Make fast and informed decisions during daily operations and emergency situations.
- Increase employee productivity with a centralized platform.
- Connect multiple video wall systems around the world for networked collaboration.

## You're in Good Company

As a result, Hiperwall has been chosen as the primary video wall software provider for water, gas, power, and mining companies around the world. They trust Hiperwall to deliver an exceptional video wall experience, so they can focus on providing crucial support to their network of customers. Organizations saw a positive effect on employee productivity, logistics monitoring, decision making and planning, emergency management, training and more.

## Our Value

To learn more about how Hiperwall can be a resource for your organization and add value for your customers and partners, please contact Ryan Lombardo at [rlombardo@hiperwall.com](mailto:rlombardo@hiperwall.com) or visit [www.hiperwall.com/contact](http://www.hiperwall.com/contact). We look forward to sharing more about Hiperwall and learning about your needs.

"We use Hiperwall to display our outage map, track vehicle locations, check the weather radar and obtain security camera feeds. Four County EMC is owned by our customers. Any money that we save during the year goes back to our customers. By improving efficiency, Hiperwall enables us to reduce our costs to our customers."

*Wayne Odom, IT Administrator, Four County EMC*
