Cutting-edge Visualization Technology Now Within Reach for Law Enforcement Agencies

Hiperwall visual command center at the Santa Ana Police Department in Southern California.

Purchasing and maintaining a video wall or visualization system for a command center used to be so expensive that it was out of reach for many law enforcement agencies. And the technology was complex, requiring specialized training. Hiperwall eliminates all of these drawbacks.

With Hiperwall, law enforcement agencies can build visual command centers at an affordable price—to save more lives. And agencies with existing visual command centers can build larger display systems in more locations at a fraction of the cost compared to existing solutions.

How do we do it? Simple. It's the nature of our technology that makes the difference. Hiperwall technology is software based and hardware agnostic. While other solutions today must be purchased in combination— both hardware and software—this is not the case for us. Hiperwall can be used with almost any hardware, and technology updates can be made within minutes. Gone are the days of being forced to purchase proprietary hardware—or allowing it to become obsolete over time. You choose which brands of computers, displays and network equipment you want to use.

Hiperwall Advantages	
Affordability	No proprietary hardware means no high-cost components.
Usability	If you can create a PowerPoint slide, you can run Hiperwall. No special training is needed.
Scalability	Add monitors and increase the size of your video wall incrementally, overtime, with each budget cycle.
Extensibility	Deliver content to multiple locations within a facility, such as a control room, conference room, private office, lobby, etc., all from one centrally managed system. With Hiperwall Share Server, you can also share data across locations from anywhere in the world.
Flexibility	Select your choice of displays, computers and network gear. Use video or data feeds from any source as is—no need for customization or integration.
Changeability	Move and resize high-resolution content instantly, and mix content from live and pre-recorded sources.

Hiperwall brings you the following benefits:

- Full situational awareness

- Effective decision support

- Live video feeds and data from almost any source deliver important information at a glance

- Specialized triggers set off automatic alerts for faster and better awareness of a situation

- Ease of use brings instant value though a brief learning curve—install and operate the same day

- All so that you can see the big picture to save lives

The greatest validation of Hiperwall's value is how it can serve you—in your agency, in your community, to protect your citizens. Interested in seeing how Hiperwall can help you? We'd be happy to answer any questions or set up a live online demonstration. Just give us a call, send us an email or visit our website. We look forward to sharing more about Hiperwall and learning more about your specific needs.
